NORCEN INDUSTRIAL GAS SYSTEM

The Norcen Industrial Gas System (IGS) is a raw gas gathering and processing of network of pipelines and gas plants located in central Alberta. The IGS assets include approximately 390 miles of pipeline (54 miles of which are leased from NUL), two compressor stations (Alexander, Legal) and three gas plants (FT. Saskatchewan, Carbondale and Golden Spike).

The IGS gathers and purchases raw gas from both third party producer and Norcen gas wells. The gas is then processed at the centrally located gas plants and specification gas sales is then delivered to large industrial and residential users in the Edmonton and Fort Saskatchewan areas. The IGS is interconnected with Nova at Redwater and Bittern Lake, allowing the IGS to provide Nova sourced gas transportation services to IGS industrial customers which represents the majority of the IGS transportation arrangement.

The following list shows the ERCB facility codes and names for the IGS facilities:
